Prathamesh Belvalkar.

Internships

Full Stack Web Developer, Wolfox, Kolhapur

SEPTEMBER 2022 — DECEMBER 2022

I had the opportunity to work on a project using the PHP programming language. I developed a blood testing management system for my college, which included features such as scheduling appointments, recording test results, and generating reports. This project allowed me to gain hands-on experience with PHP and further develop my skills in web development. I am grateful for the opportunity to have worked with the team at WOLFOX and apply my knowledge in a real-world setting.
